EXPERIENCE

Handshake AI

Remote

Trainer, Terminal-Bench 2 Evaluation Expert

Jul 2026 to Present

- Delivered 45+ evaluation projects across 10+ domains such as Maths, Software Engineering, debugging, data science, AI/ML, Network, and System Infra, benchmarking frontier **LLM agent** performance on **Terminal-Bench 2**
- Containerized reproducible evaluation environments with **Docker**, publishing versioned images to a **Harbor** registry on **Oracle Cloud Infrastructure (OCI)**
- Authored evaluation tasks end to end (instructions, reference solutions, test suites) with deliberately coupled defects (e.g., a multi currency ledger engine with 5 interdependent bugs), defeating pattern matched fixes and forcing genuine root cause debugging
- Red teamed grading harnesses against root privileged **AI coding agents**, closing 9+ sandbox escape and reward tampering vectors (path injection, startup hooks, symlink attacks) via interpreter isolation
- Built multi layer automated verification (**pytest**, **CTRF** reporting, hidden property based tests, integrity canaries) computing a binary pass/fail **reward signal** validated across multiple test orderings and interpreter hash seeds
- Iterated task submissions through a **CI/CD** gated, multi stage rubric review pipeline (static analysis, novelty detection, **LLM** based deep review, difficulty gating) on **GitHub Actions**, resolving blocking findings to reach a passing verdict on every submission

PROJECTS

LeetLens | leetlens.tech

May 2026

- Built and deployed a full stack **AI** platform on **AWS EC2** using **Nginx**, custom domain configuration, and **Let's Encrypt SSL**
- Engineered a modern frontend using **React** and **Material UI**, and implemented secure **Google OAuth 2.0** with **SSR**, reaching a **Top 10 Google search ranking** and **1,500+ organic monthly users**
- Integrated **Razorpay** payment gateway with live API keys for premium subscription checkout, implementing secure order creation, signature verification, and **JWT** authenticated payment flows
- Monetized via **Google AdSense** and built a product analytics dashboard using **Firestore** and **Power BI** to track engagement across **1,243+ AI search requests**
- Integrated **GraphQL** with **Groq LLM** using an **MCP** compliant architecture to generate personalized coding reports and learning roadmaps

TravoAI: Intelligent Travel Planner | [GitHub](#)

Feb 2026

- Developed an end to end **AI** travel booking platform using **LLM Agents (Groq Llama 3.3, Google Gemini)** to generate personalized multi day itineraries across flights, buses, hotels, and holiday packages
- Built a **Retrieval-Augmented Generation (RAG)** pipeline over a **Vector Database (Vectra)** indexing 130+ curated travel packages for contextual retrieval of destination insights and pricing
- Built the frontend with **React** and **Tailwind CSS**, adding real time weather updates and exportable travel itineraries[, cutting page load time by 25%]
- Integrated and production validated the **Razorpay** payment gateway (live API keys, order creation, signature verification) for secure transaction processing and invoicing

SKILLS

Programming Languages: C++, JavaScript, Python

Frameworks & Libraries: React, Node.js, GraphQL, FastAPI, REST APIs

Databases & Cloud: Vector Database, MongoDB, Firebase Firestore, SQL, JSON Atomic Database, AWS (EC2), Nginx, Docker, Harbor, Oracle Cloud Infrastructure

AI & GenAI: LLM Agents, LangChain, LangGraph, RAG, Agentic AI, MCP, Prompt Engineering, Groq SDK, OpenAI, Claude, Gemini

Evaluation & Testing: pytest, CTRF, Terminal-Bench, Sandboxed Grading, Adversarial/Red Team Testing

Tools & Practices: Git, GitHub, GitHub Actions, CI/CD, Razorpay API, JWT Authentication, Google OAuth

ACHIEVEMENTS

- Earned the **AI Fellow** credential from **Handshake AI**, awarded for training and evaluating models through hands on projects with top AI labs
- Won **3rd Prize** in HackTech Hackathon among **100+ teams**
- Achieved a peak LeetCode rating of 1622 and a 4 Star rating on GeeksforGeeks by solving **800+ Data Structures and Algorithms** problems in **C++**

EDUCATION

Rajasthan Technical University

Kota, Rajasthan

Bachelor of Technology in Computer Science and Engineering

Nov 2022 to Jun 2026
