ARYAN KUMAR RAJ

Full-Stack Developer

SUMMARY

Experience in building scalable web applications using modern frameworks. Deployed multiple full-stack applications on **Vercel, Render and AWS EC2**, gaining hands-on experience in system design, API development, and database management. Currently seeking Software Development roles.

EDUCATION

Rajasthan Technical University

Bachelor of Technology (B.Tech)

Computer Science and Engineering

Nov 2022 - May 2026

CGPA-8.13

SKILLS

- C++
- JavaScript
- React.js
- Node.js
- MongoDB
- Prompt Engineering
- Token Optimization
- GraphQL
- AI Workflow Design

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp by Angela Yu.
Verification Link - [Udemy](#)
- Complete Linear Regression Analysis in Python.
Verification Link - [Udemy](#)

ACHIEVEMENTS

- 3rd rank in HackTech Hackathon
- 4 star in GeeksForGeeks Coding
- LeetCode Peak Rating: 1622

PROJECTS

Leetlens Live Demo - leetlens.tech

- Solved the challenge of evaluating up to **100k monthly LeetCode profiles** while achieving **2000+ monthly users**.
- Crafted **100-point** custom prompt-engineering framework, extracting **20+** metrics from **GraphQL** and generating **1,000+ words** of personalized report.
- Implemented rate limiting to prevent **API abuse by 90%**.
- Cached **4000+ evaluation reports** in Firestore, reducing **API consumption by 50%** and **delivering results 80% faster**.
- Scaled to handle **5,000 requests/sec**, maintaining **99.9% service availability**.
- Achieved **Top-10** Google ranking from **20+ SEO keywords**.

DigiVote Github Link - github.com/digivote

- Led a **4-member team** to conduct fair, secure and accessible elections by building **256-bit SSL secured** Android application and admin panel.
- Implemented **26-way database sharding** and Docker based microservices to **support 50M+ voter records** with horizontal scalability.
- Integrated **MFS-110**, utilized **64-round SHA-256 hashing** for biometric inputs.
- Executed **100+ test cases**, fixed **10+ edge cases**, and deployed the platform on **AWS EC2** following feedback from 10+ stakeholders.

ShopperAI Live Demo- shopper.vercel.com

- Smart shopping assistant analyzes **1,000+ products**, generating personalized recommendation from **50+** demographic parameters.
- Combined **10+ custom** REST APIs with **50-point** AI decision framework while integrating one-click Google Authentication **to reduce login time by 90%**.
- Served **500+ users**, executed **100+ unit, integration, and end-to-end (E2E) test cases** to ensure reliability and low-latency performance.

PROFESSIONAL EXPERIENCE

Web Developer Intern

Proscon Automation and Training Institute, Kota

June 2025 - July 2025

- Introduced 10+ features, fixed 20+ critical bugs, reducing load time by 40% through collaborative development efforts.
- Conducted thorough evaluations of **30+ pull requests** in collaboration with three cross-functional teams, driving improvements in code standards and accelerating delivery timelines by 15% while maintaining high-quality output.
