EXPERIENCE

AI Data Contributor

Jul 2026 – Present

Handshake AI (Project Dynamo)

Remote

- Authored a **Software Engineering** benchmark implementing a thread-safe PostgreSQL **IdempotencyLedger** in Python with atomic transactions and TTL eviction, passing all 32 verifier tests.
- Engineered an **AI Data Science** benchmark applying core **data modeling principles** to harmonize multi-format telemetry datasets (CSV, JSONL, Parquet) with cross-source identity resolution and pytest verifier suites.
- Designed a **Debugging & Repair** benchmark around a multi-threaded C++/Node.js N-API native addon, requiring LLM agents to resolve memory leaks and race conditions under load.
- Developed **Systems Infrastructure** benchmarks, including a Gröbner-basis puzzle verified via Harbor oracle runs and a glibc-to-musl dynamic linker migration task.
- Validated all benchmark tasks via **Docker-based Harbor agent oracles** and automated **GitHub Actions CI** pipelines, encompassing continuous evaluation, static code checks, and performance profiling.

PROJECTS

Nxt Ventures - Startup Navigator | [Live Demo](#)

2026

- Engineered a full-stack AI prototype for startup validation, utilizing **data modeling principles** to architect a custom **JSON Atomic Database**, bypassing traditional vector databases for a highly efficient **RAG pipeline**.
- Implemented hybrid semantic retrieval and citation generation within a **vectorless architecture** to deliver explainable AI recommendations from unstructured datasets.
- Designed a modular evaluation engine integrating **LangChain** and **LangGraph** to orchestrate parallel AI agents, enabling the simultaneous research, analysis, and **quantitative scoring** of startup ideas against target markets.
- Developed business analytics modules for **unit economics**, profitability, break-even analysis, and investment feasibility, and validated outputs through extensive functional testing.

LeetLens | leetlens.tech

2026

- Built and deployed a full-stack AI platform on **AWS EC2** using **Nginx**, custom domain configuration, and **Let's Encrypt SSL**.
- Implemented secure **Google OAuth 2.0**, **JWT** authentication, metadata optimization, sitemap generation, structured data, and SSR techniques to improve search engine indexing.
- Integrated **Razorpay** payment gateway with live API keys for premium subscription checkout, implementing secure order creation, signature verification, and **JWT**-authenticated payment flows.
- Developed a product analytics dashboard using **React** and **Firestore**, and built **Power BI** visualizations to analyze usage trends across **329+ unique users** and **924+ AI search requests**.
- Integrated **GraphQL** with **Groq LLM** using an **MCP-compliant** architecture to generate personalized coding reports and learning roadmaps.
- Managed Agile development workflows using **JIRA** for sprint planning and bug tracking, and maintained API documentation and user stories in **Confluence** to iteratively improve application reliability and user experience.
- Engineered an automated telemetry pipeline utilizing **MediaDevices** and **Geolocation APIs** for periodic image capture and coordinate tracking, enabling robust user analytics and document processing workflows.

SKILLS

Programming Languages: C++, JavaScript, Python

Frameworks & Libraries: React, Node.js, N-API, GraphQL, FAST API, REST APIs, pytest

Databases & Cloud: Vector Database, MongoDB, Firebase Firestore, SQL, JSON Atomic Database, AWS (EC2), Nginx

AI & GenAI: LLM Agents, LangChain, LangGraph, RAG, Agentic AI, Prompt Engineering, Groq SDK

Tools & Practices: GitHub Actions, Git, CI/CD, JIRA, Confluence, Power BI, Razorpay API, Docker, JWT Authentication, OpenAI, Claude, Gemini, Google OAuth

ACHIEVEMENTS

- Won **3rd Prize** in HackTech Hackathon among **100+ teams**.
- Achieved a peak LeetCode rating of 1622 and a 4-Star rating on GFG by solving 800+ DSA problems in **C++**.
- Built and launched AI-powered web applications used by **1,000+ organic users**.

EDUCATION

Rajasthan Technical University

Kota, Rajasthan

Bachelor of Technology in Computer Science and Engineering

Graduation date – Jun 2026

- **Last Sem GPA: 9.5**
