ABOUT ME

Full-Stack Developer skilled in optimizing application performance and leading a 4-member development team. Built and hosted 256-bit SSL secured, capable of handling up to 4,000 requests per second using modern JavaScript frameworks.

EDUCATION

Rajasthan Technical University

Kota, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2022 – 2026

CGPA: 8.13

SKILLS

Technical: React.js, Node.js, MongoDB, C++, Python, JavaScript, HTML, CSS, TypeScript

Concepts: OOPs, SDLC, System Design, DSA, Agile Methodology, Prompt Engineering, Testing, CI/CD, Generative AI

Tools: AWS (EC2), Nginx, GraphQL, Docker, Claude, Copilot, Codex, AntigraVity, Postman, GroqAPI

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp – May'26 ([link](#))
- Complete Linear Regression Analysis in Python – Apr'25 ([link](#))

EXPERIENCE

Proscon Automation & Training Institute

Kota, India

Web Developer Intern

06/25 – 08/25

- Collaborated in a 3-member team to deliver 10+ features and resolve 15+ bugs using Agile methodologies.
- Reviewed 15+ pull requests, accelerating team delivery timelines by 20% while maintaining high code quality.
- Participated with 3 cross-functional teams to design and implement new features sets.

Octanet Services Pvt. Ltd.

Remote

Web Developer Intern

05/24 – 07/24

- Developed 15+ reusable **React.js** components, reducing page rendering time from 3.4 seconds to 2.2 seconds.
- Used Chrome DevTools to identify rendering bottlenecks and optimize frontend performance.

PROJECTS

LeetLens Live Demo: leetlens.tech

05/26 – Present

- Built a SaaS platform capable of evaluating up to 10,000 profiles/month.
- Configured **Nginx Load Balancer** across 5 ports to manage 4,000 req/sec with 99.9% uptime.
- Extracted 20+ metrics using **GraphQL** and developed a 100-point **AI Workflow Design** for **Generative AI**, generating 1,000+ word personalized reports.
- Implemented **MongoDB** caching, reducing API usage from 100 requests per day to 30 requests per day.

DigiVote Github: github.com/digivote

01/26 – 04/26

- Led a 4-member team to build a 256-bit SSL-secured election platform.
- Architected a **Distributed System** using 26-way alphabetical sharding across **26 MongoDB** shards in **Docker containerization**, enabling horizontal scalability for up to 50 Million voter records.
- Resolved 20+ technical issues based on stakeholder feedback to ensure robust **SDLC** practices.

ACHIEVEMENTS

- Won 3rd prize in HackTech Hackathon among 100+ teams .
- Peak LeetCode Rating: 1622 | GFG: 4-stars | Participated in 100+ coding contests, demonstrating strong **DSA** skills.
